DETAILED ACTION***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 10-21, 23-28 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-18 of prior U.S. Patent No. 6,734,533. This is a double patenting rejection. The two sets of claims are identical in scope, namely, a carbon doped oxide film having a modulus of about 20 GPa or higher, a carbon doped oxide film having a hardness of about 2.8 GPa to about 3.5 GPa, and a carbon doped oxide film with both the claimed modulus and claimed hardness. The "integrated circuit" of claims 1-18 in US 6,734,533 appears in the preamble, and therefore carries no patentable weight.
